VERSION DESCRIPTION
Version 1 - This file is edited dataset, clean, anonymized, available for public use.

PRODUCTION DATE
2013-07-03

Overview

ABSTRACT
The CPS survey is a follow up survey designed to provide information that will help to evaluate the current situation and status of the police services which had been delivered to the public since 2010 which was conducted by NUS Consult Ltd. It aims to provide an enabling environment to facilitate quality policing services, and, for policing services to deliver the most effective and efficient services pertaining to public safety, crime, and, general policing within Samoa.

The CPS 2013 is a nationally representative sample survey designed to collect data that would help to evaluate policing programs over the previous three years (2011-2013), and, to provide feedback and views from the community or public on the delivery of policing services to all.

KIND OF DATA
Sample survey data [ssd]

UNITS OF ANALYSIS
Individuals 18 years of age and over were the units of analysis.

Coverage

GEOGRAPHIC COVERAGE (1)
National coverage

GEOGRAPHIC COVERAGE (2)
Region

UNIVERSE
The target population was adults 18 years and older residing in the community.

Sampling

Sampling Procedure

In national statistical surveys, the region of Apia Urban Area (AUA) represented the urban population while the regions of North West Upolu (NWU), Rest of Upolu (ROU) and Savaii represented the rural population.

The target population was adults 18 years and older residing in the community. Hence all persons 18+ who were usual residents of the household were eligible in the survey. The sample for the CPS 2013 was drawn from the master sample frame of the List of occupied households compiled in the most recent Population and Housing Census 2011. The sample size was based on a 95 percent confidence interval of ± 5 percent margin of error; assuming an 80 percent response rate; a design-effect of 1.5 to allow for clustering of the complex design; and; an average of 3 persons 18+ per household. The design also considered the features of a follow-up survey assuming that the policing services had improved by at least 10 percent since the baseline CPS 2010 results. After taking into account all those features, it resulted in the required sample size of 540 persons aged 18 years and older.

Therefore in order to achieve the sample size, a representative probability sample of households was selected in two stages The first stage involved the selection of clusters from the master sample frame using stratified systematic sampling with probability proportional to size. A total of 45 primary sampling units or clusters were selected in which 10 clusters were selected from the urban areas and 35 clusters were selected from the rural areas. The design did not allow for replacement of clusters or households.

In the second stage, a total of 5 households were selected from each cluster using systematic equal probability selection for inclusion in the survey. Normally an updated household listing from selected clusters could have been done to select 5 households. However, due to the unexpected request of the MPP survey in February 2013, and the fact that the census 2011 was just completed in the previous two years, it was seen not necessary to conduct a fresh household listing which would have taken SBS another two months to carry out causing delay to the survey.

Response Rate

A total of 225 households were selected for the sample of which 216 were found occupied at the time of the survey. Of the occupied households, only 209 were successfully interviewed resulting in a household response rate of 96.8 percent. The other households were not available throughout the survey period despite repeated visits by the field teams.

The total eligible persons 18 years and older who were found in the interviewed households were 731. Out of this total, only 645 were successfully interviewed yielding the Individual response rate of 88.2 percent.

The response rates by sex shows 90 percent for females and 87 percent for males which is not surprising as males usually spent more time away from home than females. That situation was reflected more in the regions of North West Upolu and Rest of Upolu than in Savaii and Apia Urban Area. The high response rate in Savaii was due mainly to the field teams sleeping over in Savaii for one week. Therefore, the Savaii team had extra time after hours to make call-backs while the team in Upolu had to commute daily until 7pm for repeated visits, hence missed out on those who come home later.

Weighting

Given the complex sampling design used to control survey costs, sampling weights are routinely used in probability sampling to compensate for unequal probabilities of selection and adjustments for non-coverage of the population and non-response. The weights will ensure that the sample is representative of the national and regional population. The sampling weight for each household is the inverse of its overall selection probability with correction for non-response and the individual weight is the household weight with correction for individual non-response. Once those complex design features are compensated for, then weights can be used in the estimation of the population characteristics of interests and the sampling errors of the survey estimates. Unweighted numbers will be used to report response rates but all other survey estimates and precision will be based on weighted numbers.

Questionnaires

Overview

Based on the request by MPP, a structured English questionnaire which was used in the CPS 2010 was also implemented in the CPS 2013. However, SBS made some improvements in terms of instructions between questionnaire sections in order to make the interviewing flow properly from beginning to end. The questionnaire was also translated into the Samoan language to complement the English questionnaire so that the interpretation of questions by the field enumerators was consistent on the field. In addition, since probability sampling and complex design was used, a new cover page of the questionnaire was developed so that selected clusters and household identification were clearly made and that features to account for non-coverage of the households and non-response of eligible persons 18 years and older were also accounted for during the fieldwork.

The questionnaire therefore has five parts. Section A has 5 questions about the respondent details. Section B contains 7 questions intended to find out the community's views on safety and crime plus an open question for the respondents to express their own opinions about the topic. Section C contains 7 questions to find out the respondents personal awareness and experience (if any) of crime and crime management. An open question was also added for their own opinions. Section D contains 4 sub-sections (D1 to D4) which seek questions on the overall community perception of the MPP services whereby each sub-section also contained open-questions. D1 contains 3 questions about the assistance sought by the community at the MPP. D2 contains 2 questions about the control of crime. D3 contains 4 questions about police service in general and D4 contains 2 questions about the access to police information, education and communication. Section E is the last section which was again open to the respondents to make their own suggestions on how police can improve their job to assist the community.

Data Collection

Data Collection Dates

Start	End	Cycle

Data Collection Mode

Face-to-face [f2f]

Data Collection Notes

A total of eight enumerators were recruited to assist two senior staffs in the conduct of the CPS 2013 on the field. The training was conducted for three full-days before the pre-test. The questionnaire was first pre-tested among the census staffs before it was actually pre-tested in the village of Apia for one day.

The purpose of the field pre-test was to familiarise the hired enumerators on the identification of households from the enumeration maps and list of households; gain interviewing skills both in English and Samoan, gain experience in filling out the questionnaire during the face-to-face interviews, gain experience in coding after the interviews, as well as learning how to approach different types of respondents young and old, employed or not. Lessons learned were used to finalise the questionnaire contents and enumerators instructions before the actual data collection fieldwork.

Questionnaires

Based on the request by MPP, a structured English questionnaire which was used in the CPS 2010 was also implemented in the CPS 2013. However, SBS made some improvements in terms of instructions between questionnaire sections in order to make the interviewing flow properly from beginning to end. The questionnaire was also translated into the Samoan language to complement the English questionnaire so that the interpretation of questions by the field enumerators was consistent on the field. In addition, since probability sampling and complex design was used, a new cover page of the questionnaire was developed so that selected clusters and household identification were clearly made and that features to account for non-coverage of the households and non-response of eligible persons 18 years and older were also accounted for during the fieldwork.

The questionnaire therefore has five parts. Section A has 5 questions about the respondent details. Section B contains 7 questions intended to find out the community's views on safety and crime plus an open question for the respondents to express their own opinions about the topic. Section C contains 7 questions to find out the respondents personal awareness and experience (if any) of crime and crime management. An open question was also added for their own opinions. Section D contains 4 sub-sections (D1 to D4) which seek questions on the overall community perception of the MPP services whereby each sub-section also contained open-questions. D1 contains 3 questions about the assistance sought by the community at the MPP. D2 contains 2 questions about the control of crime. D3 contains 4 questions about police service in general and D4 contains 2 questions about the access to police information, education and communication. Section E is the last section which was again open to the respondents to make their own suggestions on how police can improve their job to assist the community.

Supervision

The actual fieldwork started in April 18th to May 3rd. The call backs or repeated visits were made afterwards for another three weeks from May 6-24. The coding of closed-ended questions was done during the interviews but the coding for the open-questions in each section of the questionnaire was a bigger challenge which took two weeks for the full-time staffs to summarize into major issues. After coding, the computer data program was created using CSPro 5 software for data entry. After testing the program, the data entry was conducted in one week (May 27-31).

The role of the supervisor was to coordinate field data collection activities, including management of the field teams, supplies and equipment, finances, maps and listings, coordinate with local authorities concerning the survey plan and make

arrangements for accommodation and travel. Additionally, the field supervisor assigned the work to the interviewers, spot checked work, maintained field control documents, and sent completed questionnaires and progress reports to the central office.

Data Processing

Data Editing

The data editing, cleaning and weighting of the data took another two weeks (June 4-14) to complete, leaving only two weeks (June 17-30) to analyse and write the analysis report to meet the deadline.

Invalid: 207 (2893.1)

Description	

1.Single is someone who is not in a relationship or is "unmarried".

2.De-facto also known as "informal union". It is a relationship in which a man and a woman live together for some time as a couple, intending to have a lasting relationship but they are not married to each other or do not have a formal civil or religious ceremony.

3.Married is when a man and woman establish their decision <http://dictionary.reference.com/browse/decision> to live as husband and wife by legal commitments, religious ceremonies, etc

4.Separated is not a complete break of the legal union of marriage. It is a half way status that comes with its own set of legal rules, it can either through court proceedings or with an informal agreement between parties.

5.Divorced is the legal termination of a marriage by a court in a legal proceeding, requiring a petition or complaint for divorce (or dissolution in some states) by one party

6.Widowed. A married person whose spouse has died and who has not remarried

9. Not stated

Range: 1-9

Valid cases: 242 (36661.4)

Invalid: 591 (60897.9)

Pre question

Except where otherwise indicated, please place a tick in the appropriate box or boxes and fill in your response on the lines when further information is indicated.

Literal question

Where did that crime take place?

C4. who managed/resolved that crime (W_M_R_C)

File: PERSONS

Overview	
Type: Discrete	Valid cases: 241 (36499.8)
Format: numeric	Invalid: 592 (61059.5)
Width: 6	Mean: 202372.4 (202335.4)
Decimals: 0	Standard deviation: 38978.9 (38901.1)
Range: 111122-222222	

Pre question

Except where otherwise indicated, please place a tick in the appropriate box or boxes and fill in your response on the lines when further information is indicated.

Literal question

Who managed/resolved that crime?

Post question

you may tick more than one of the following

Interviewer instructions

This question collects data on which of the above-mentioned authorities/parties were commonly involved to help resolve the problem stated in Q1. For this particular question you can tick more than one answer.
If the respondent point out a new answer that does not match to any of the given ones, then you need to tick the box beside "OTHERS" and record the answer exactly as they are given. Tick only one box that corresponds to respondent's answer.

C5. was the matter reported to the police (MATTER_REPORTED)

File: PERSONS

Overview	
Type: Discrete	Valid cases: 241 (36499.8)
Format: numeric	Invalid: 592 (61059.5)
Width: 1	
Decimals: 0	
Range: 1-9	

Pre question

If the crime was managed/resolved by police, please answer the following questions, if not, go to Section D

Literal question

Was the matter reported to the Police?

Post question

If Yes go to Q.6, if No or Dont know skip to Section D

Interviewer instructions

If the respondent's answer is NO, then you need to read and follow the skip instruction provided for you. For this particular example if the answer is NO you don't need to answer any of the following questions but skip straight to Section D

C6. was the matter investigated by the police (INVESTIGATED)

File: PERSONS

Overview	
Type: Discrete	Valid cases: 206 (31189.1)
Format: numeric	Invalid: 627 (66370.1)
Width: 1	
Decimals: 0	
Range: 1-9	

Pre question

If the crime was managed/resolved by police, please answer the following questions, if not, go to Section D

Literal question

Was the matter investigated by police?

C6. was the matter investigated by the police (INVESTIGATED)
File: PERSONS

Post question

If Yes go to Q.6, if No or Dont know skip to Section D

Interviewer instructions

Ask the respondent whether the crime was investigated by police. Tick the appropriate box that corresponds to the respondent's answer. If the respondent mention that the matter was investigated by the Police then tick code 1 "Yes" and move on to the Q.7 but if the respondent state that the Police did not investigate the matter or don't know then mark the right answer and follow the skip instruction provided.

If the respondent's answer is NO, then you need to read and follow the skip instruction provided for you. For this particular example if the answer is NO you don't need to answer any of the following questions but skip straight to Section D

C7. were you satisfied with how the police managed/resolved the matter (SATISFIED)
File: PERSONS

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-5
Invalid: 9

Valid cases: 193 (29180.1)
Invalid: 640 (68379.2)

Pre question

If the crime was managed/resolved by police, please answer the following questions, if not, go to Section D

Literal question

Were you satisfied with how the police managed/resolved the matter?

Interviewer instructions

Question 7 is a ranking question and you need to ask the respondent to rank whether he/she was satisfied with the Police handling/resolving the incident or not. Circle the number that corresponds to the respondent's answer.

D1.1. sought assistance of the police in the last 12 months (ASS_LST_12MNTHS)
File: PERSONS

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-2

Valid cases: 626 (94692.7)
Invalid: 207 (2866.5)

Pre question

Except where otherwise indicated, please place a tick in t he appropriate box or boxes or circle the appropriate number and fill in your response on the lines when further information is indicated.

Literal question

Have you sought the assistance of the Police in the last 12 months?

Post question

if No, skip to D2

Interviewer instructions

For this question you need to probe carefully to the respondent if he/she asks any assistance of the Police during the last 12 months. You are recommended not to rush the respondent but to give them time to think because 12 months is a very long period and it might take a while for the respondent to recall his/her memory.

If the respondent says that he/she request the assistance of the Police during the reference period , then you need to mark the box "YES" and proceed with the remaining questions but if the respondent says NO, then tick the box "NO" and follow the skip instruction provided. You do not need to continue answering the remaining questions of D1.

D1.2. how satisfied were you with the assistance (S_A_PROVIDED)
File: PERSONS

Overview

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-5
Invalid: 9

Valid cases: 116 (17846.5)
Invalid: 717 (79712.7)

Pre question

Except where otherwise indicated, please place a tick in t he appropriate box or boxes or circle the appropriate number and fill in your response on the lines when further information is indicated.

D1.3. point of contact with the police (POINT_CONTACT)
File: PERSONS

Overview

D1.3. point of contact with the police (POINT_CONTACT)
File: PERSONS

Type: Discrete
Format: numeric
Width: 1
Decimals: 0
Range: 1-4
Invalid: 9

Valid cases: 116 (17846.5)
Invalid: 717 (79712.7)

Pre question

Except where otherwise indicated, please place a tick in t he appropriate box or boxes or circle the appropriate number and fill in your response on the lines when further information is indicated.

Literal question

What was your point of contact with the police.

Interviewer instructions

Q.3 helps to identify how the respondent made contact with the Police when seeking their assistance. Tick the right box that corresponds to the respondent's answer and proceed to the next question. If the respondent point out a new answer that does not match to any of the given ones, then you need to tick the box beside "OTHERS" and record the answer exactly as they are given. Tick only one box that corresponds to respondent's answer.
